

The MEC-NSBE project is the Medgar Evers College student chapter page that fulfills and requires events and networking. This page consists of a home page which is an introduction page explaining what our student chapter is about, in addition, there are pages for scholarship opportunities which open doors for resources, an internship opportunity page which will grant students access to a mentor and job opportunity page which will provide a career coach. Furthermore, there is an event calendar on the MEC\_NSBE page so that chapter members can be informed and have network opportunities that can expand students' horizons. In conclusion, there is user registration page, user login, user forgot password and user delete account page, ultimately NSBE's mission is ***“to increase the number of culturally responsible black engineers who excel academically, succeed professionally and positively impact the community.”***
